Università degli Studi di
Modena e Reggio Emilia
Corso di Laurea in Ingegneria
Informatica

Augmented Reality Framework

AR Foundation

Candidato: Manuel Gherardi
Relatore: Nicola Bicocchi
Fatto con: Canva

Anno Accademico: 2025/2026

UNIMORE
UNIVERSITÀ DEGLI STUDI DI
MODENA E REGGIO EMILIA

Cos’è l’AR?

COME VIENE VISUALIZZATA

Spatial AR

See-through AR

Optical See-through

Video See-through (Passthrough)

COME IL DISPOSITIVO RICONOSCE LO SPAZIO O GLI OGGETTI

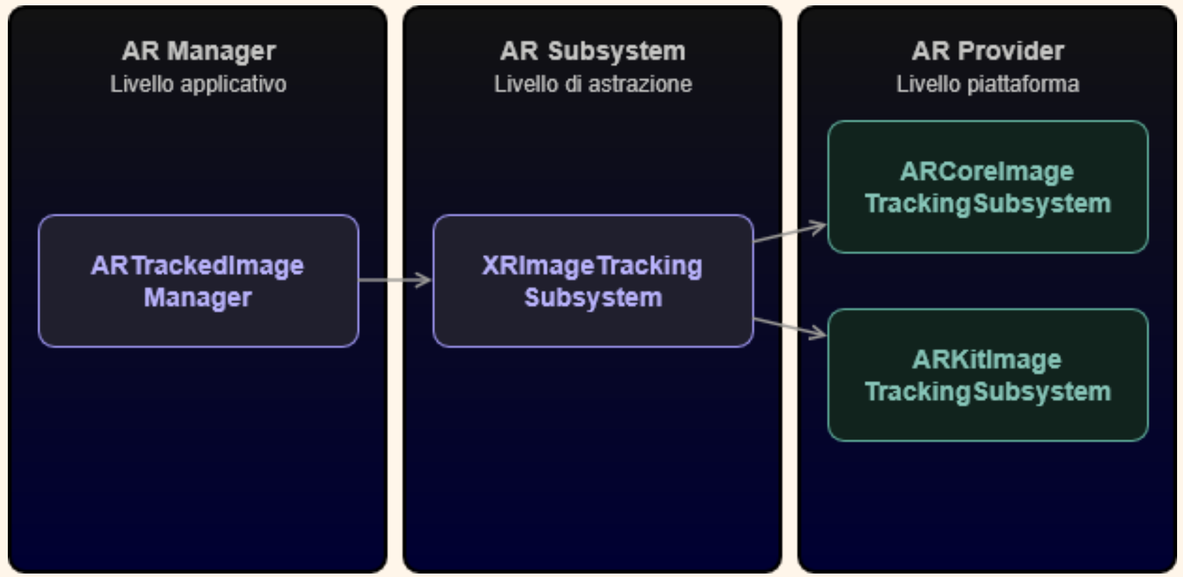

Marker Based vs Markerless

Come Funziona?

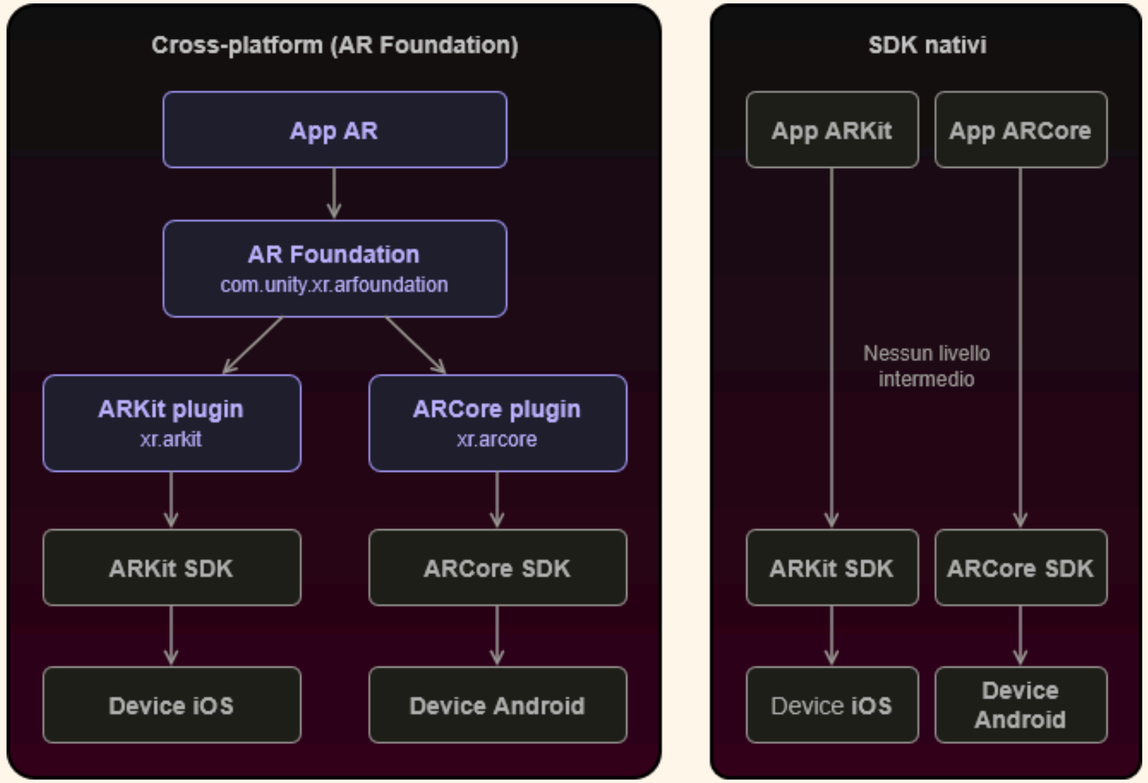

AR Foundation

Architettura a basso livello

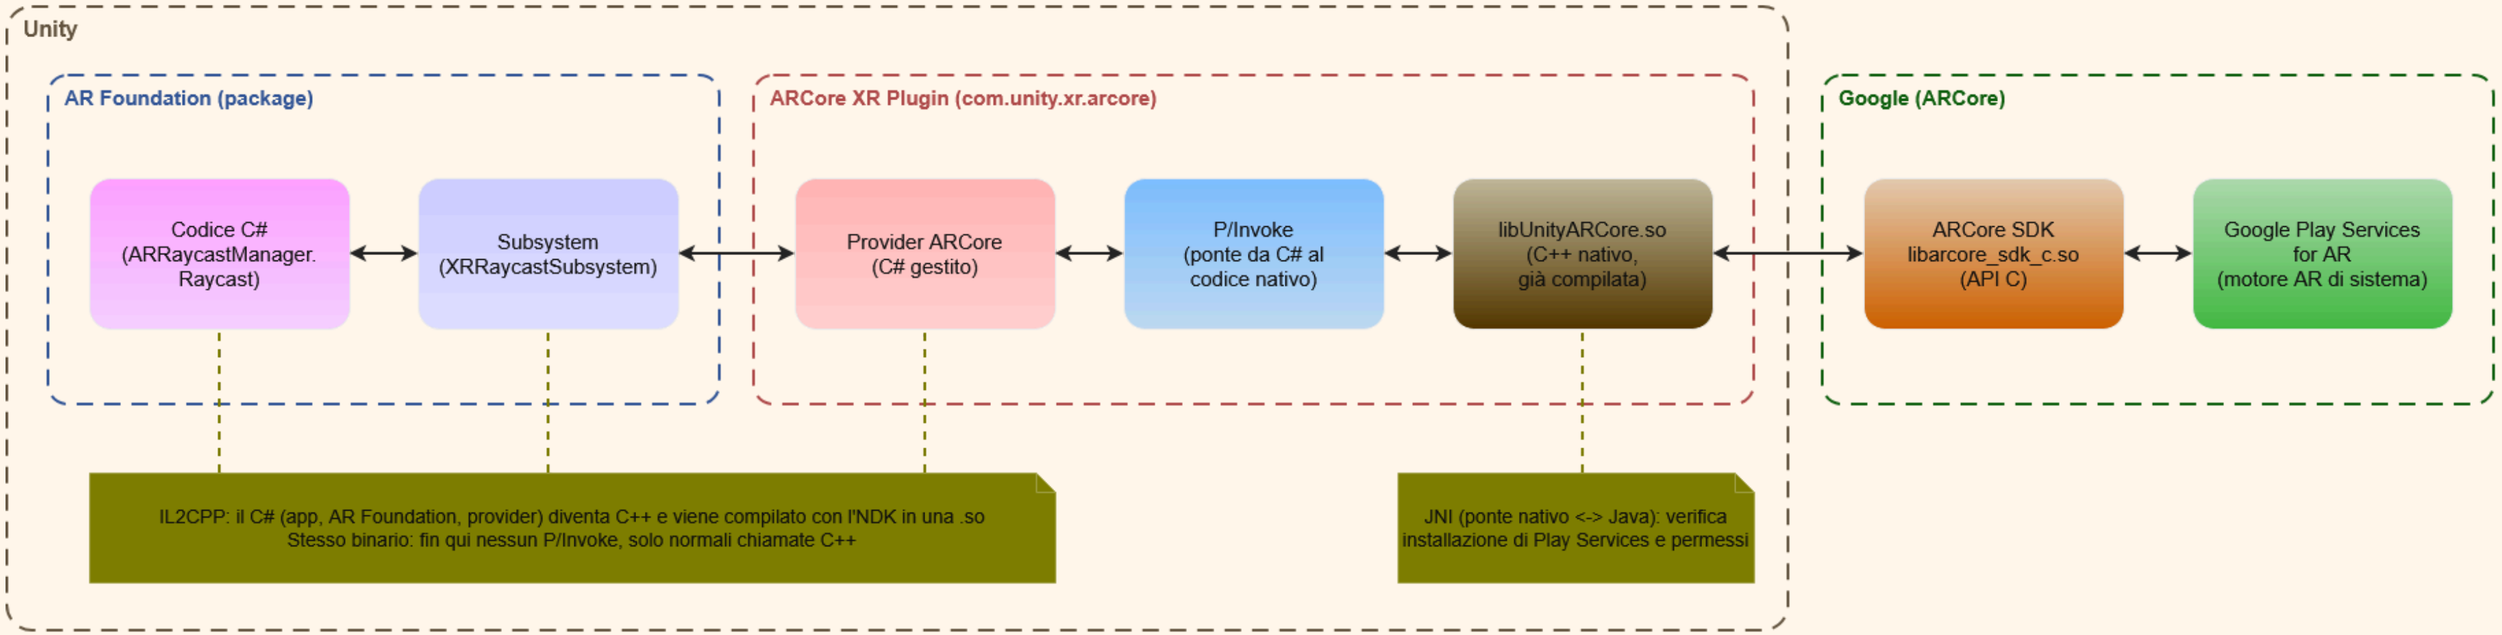

Architettura ad alto livello

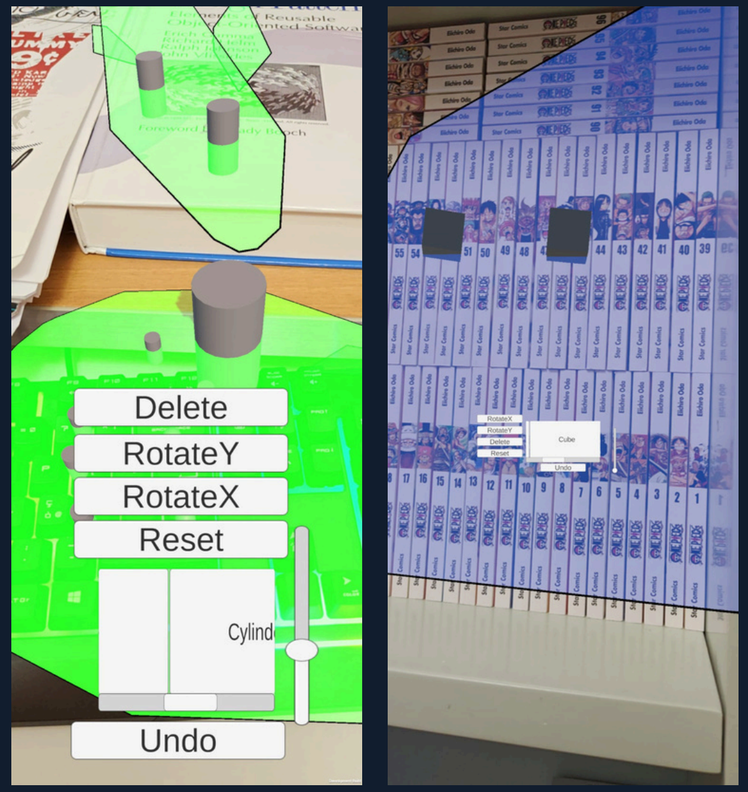

Come funziona a Runtime?

Cosa succede a runtime: da C# al motore AR di sistema

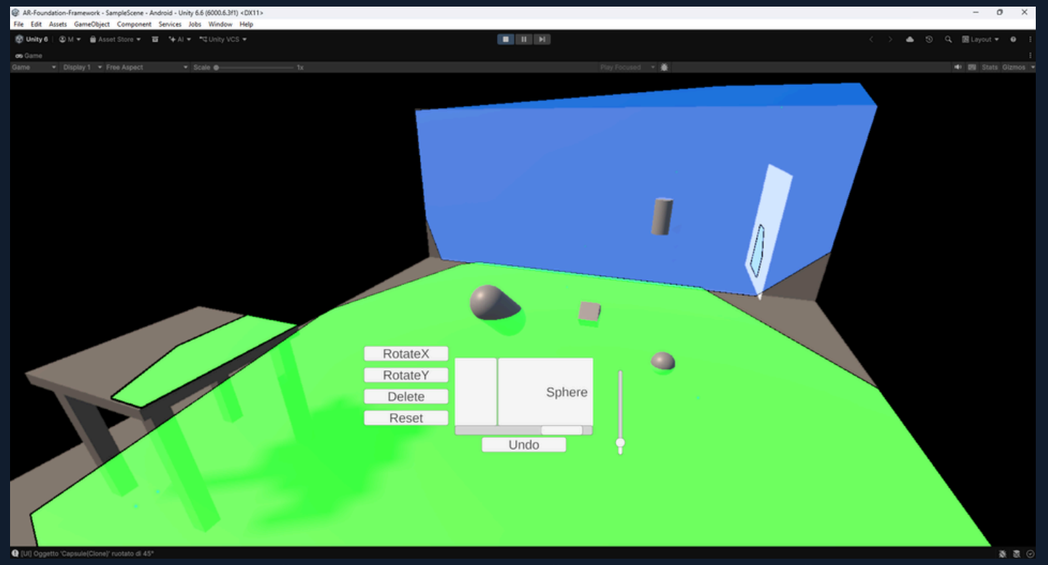

Frecce bidirezionali: i risultati fanno il percorso inverso e arrivano allo sviluppatore (ARPlane, hit del raycast)

App

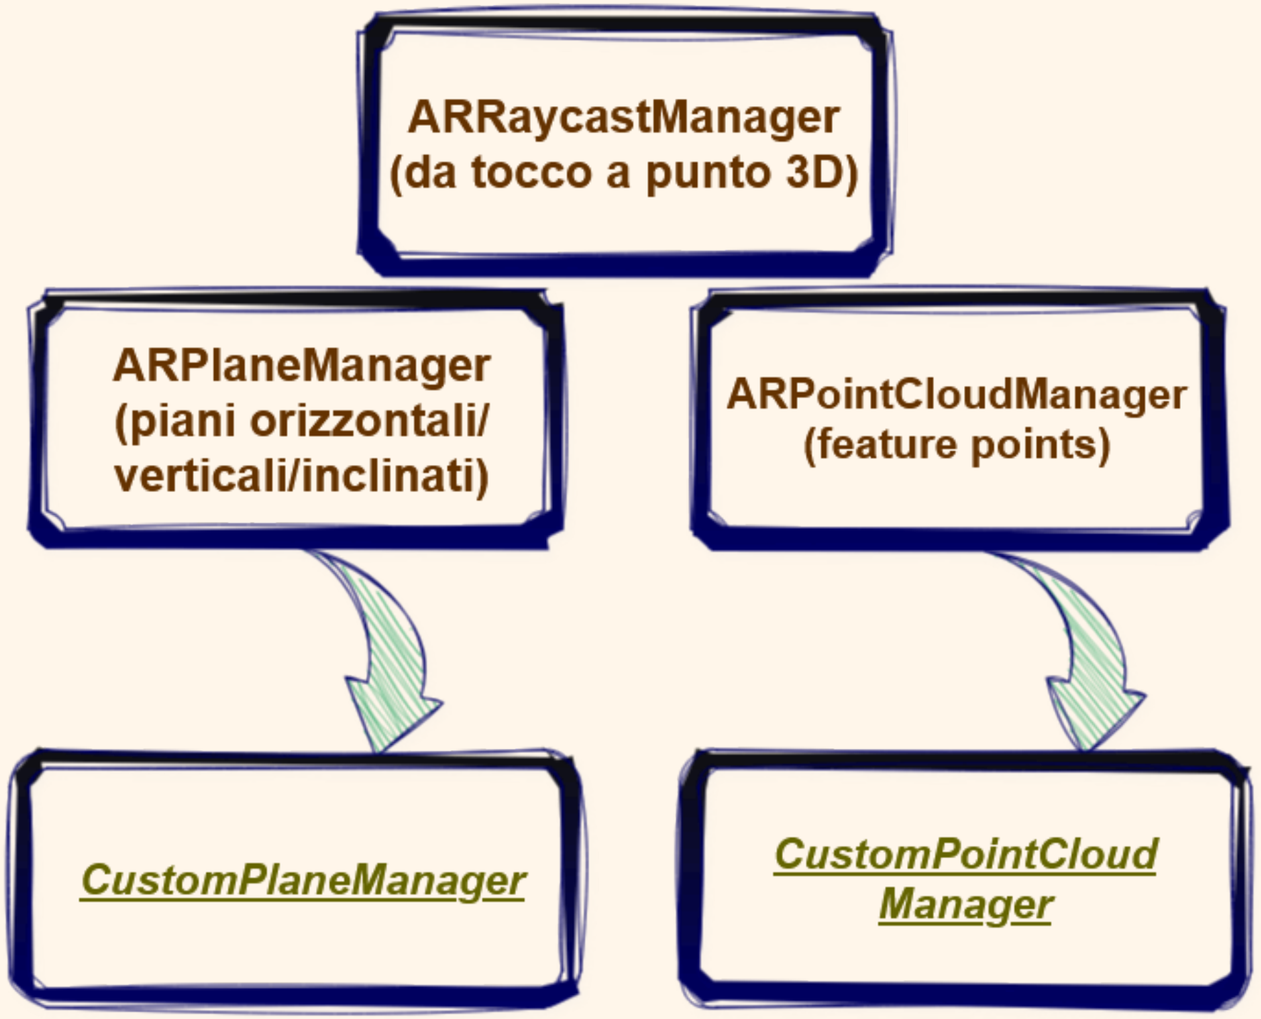

Mobile, in my smartphone

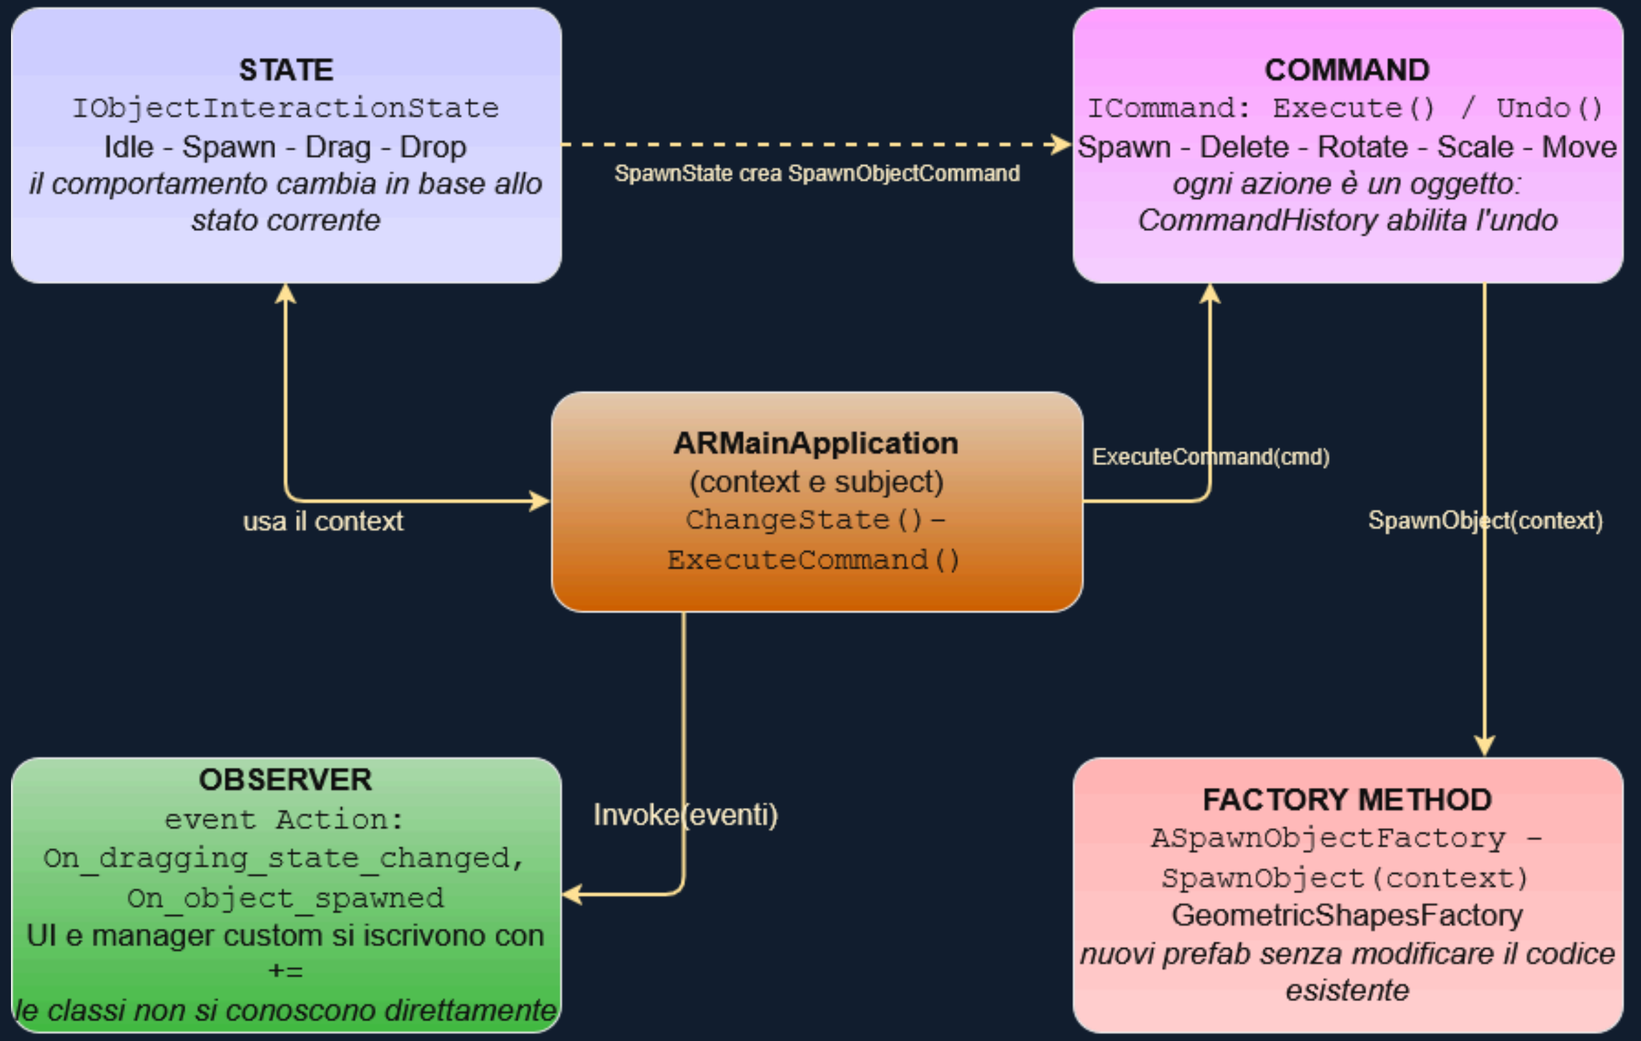

XR Simulator, in the Unity Editor

Componenti AR Usati

Design Pattern

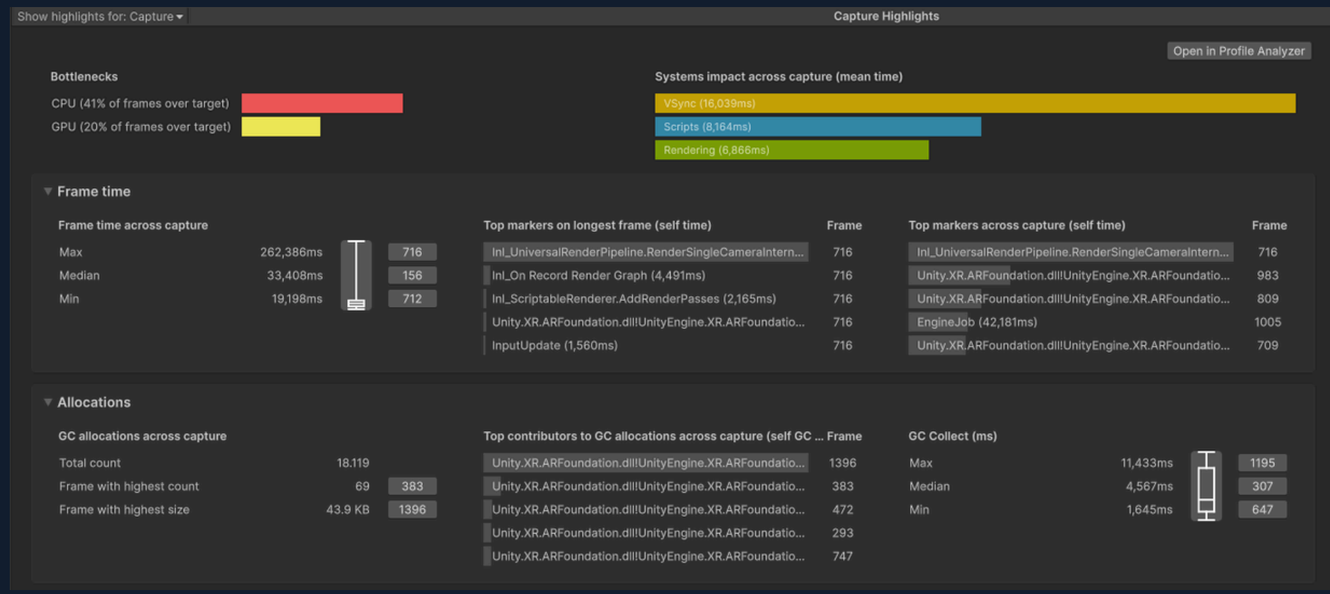

Design pattern dell'app: come collaborano

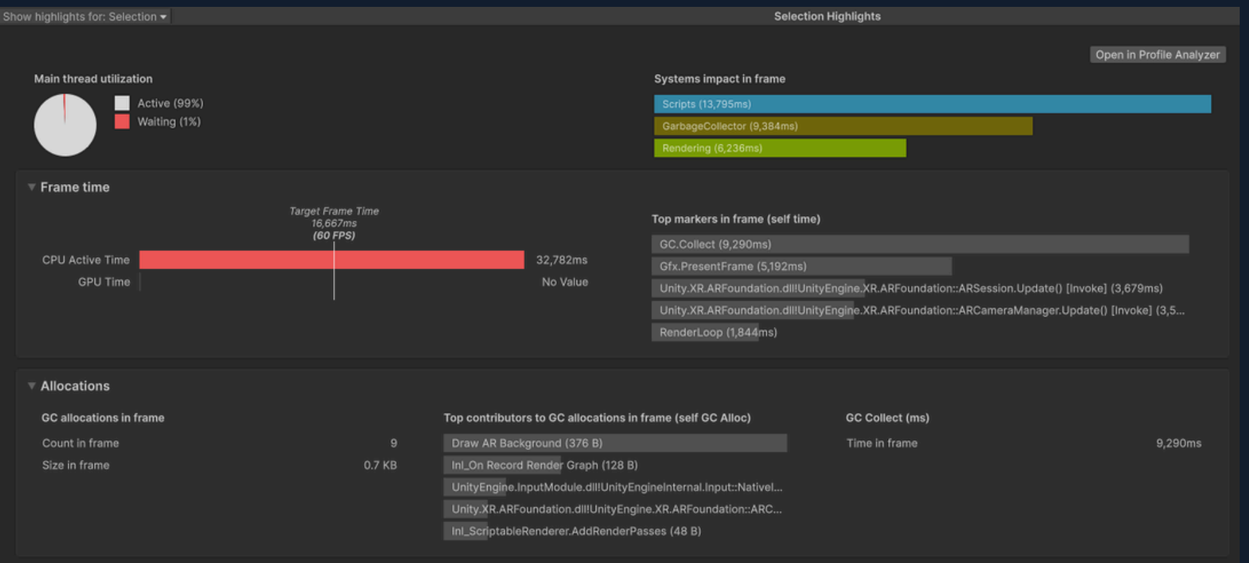

Esempio, spawn di un oggetto: tocco su un piano SpawnState -> SpawnObjectCommand -> Factory crea il prefab -> NotifyObjectSpawned (Observer)

Profiling & Testing: Unity Profiler

Highlights Capture (Globale)

Highlights Selection (Locale)

Conclusione

ARCHITETTURA

AR Foundation

ARCore / ARKit

PROFILING & TESTING

Performance

Criticità

APPLICAZIONI

Interior Design & E-commerce

Didattica & Architettura

SVILUPPI FUTURI

Ottimizzazione Codice

Configurazione AR & Test

Grazie per l’attenzione
